

Veeam Cloud Connect for the Enterprise Elevates Availability for the Always-On Enterprise with Microsoft Azure and Enables Granular Recovery

MICROSOFT AZURE APP BUILDER PROFILE: VEEAM SOFTWARE

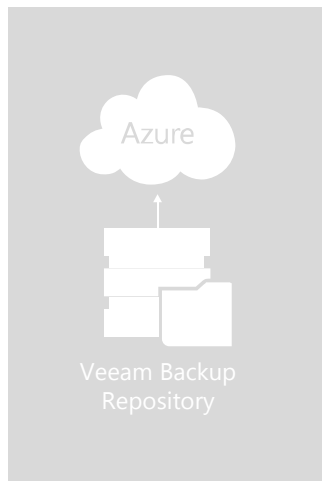

Veeam plus Microsoft Azure delivers easy, efficient ways to get backups offsite, and into the cloud to provide *Availability for the Always-On Enterprise*. Through fast backup and offsite backup storage services for Hyper-V and vSphere environments, Veeam solutions enable granular recovery from Exchange, SQL Server, Active Directory, and SharePoint.

WHAT WE OFFER

Easy to get started

Veeam Cloud Connect *for the Enterprise* makes it easy to establish your Veeam-powered backups to Microsoft Azure. With a single server and just 30 minutes, customers can configure their cloud infrastructure for Veeam, a Microsoft Azure Certified solution.

Easy for customers

Available in the Azure Marketplace, Veeam Cloud Connect *for the Enterprise* makes it easy for enterprise customers to securely connect and perform backup jobs over the Internet or WAN and from various business locations directly to Azure – without the need for a VPN connection.

Easy for extend

Veeam Cloud Connect *for the Enterprise* is licensed as an annual subscription per VM as an add-on purchase to Veeam Availability Suite or Veeam Backup and Replication. With no minimum requirement for the number of VMs, customers can purchase licenses for all or part of their environments.

Easy and secure

Veeam Cloud Connect *for the Enterprise* gives you peace of mind with end-to-end encryption. Customers can encrypt data at the source, in flight and at rest, and it moves data to Azure repositories quickly with built-in WAN Acceleration.

VEEAM CLOUD CONNECT FOR THE ENTERPRISE

“Veeam Cloud Connect *for the Enterprise* makes it easy for enterprise businesses with multiple remote offices to create centralized, offsite repositories for their Veeam-powered backups and securely connect them to Microsoft Azure.” – Doug Hazelman, Vice President of Product Strategy at Veeam

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
