

Work From Virtually Anywhere

Microsoft Office 2010 allows team members to manage business wherever they are, accessing information easily via PC, phone and browser.

Create and Share Information Anytime, Anywhere

To maintain its position as an industry leader, Pfizer, the world's largest research-based pharmaceutical company, needed to increase the productivity of its research and development teams with seamless access to files, whether working online or remotely. Office Professional Plus 2010 allows the team to access, update and share information from virtually any computer with an Internet connection.

"With Microsoft OneNote 2010 and OneNote Web App, we will have the power to create and share information—anytime, anywhere. We expect to make better, more informed decisions—and make them more quickly."

Customer Engagement Manager,
Worldwide Technology, Research and
Development Informatics
Pfizer

Improved Collaboration with Integrated Applications

Launched in 1987, Gafcon, Inc. provides comprehensive construction services. To maintain its reputation for unsurpassed quality, Gafcon deployed Microsoft Office 2010 for an efficient, intuitive new productivity suite that helped employees streamline workflow, respond to clients faster, and accomplish more in less time.

"We used to work in a series, with each user integrating information into a document one at a time, so it could take eight hours to complete a proposal. Co-authoring tools cut that time in half."

Jessica Stepan
Senior Marketing Coordinator
Gafcon

Flexible Access

With a small staff, France-based IT provider Ordinaire found it a challenge when addressing the needs of a broad customer base. They found their solution in Microsoft Office 2010.

"We used to have to compress files, confirm receipt, and wait. With Web Apps, it's instant: You click on the link, connect, and show. No downloads, no downtime—it's one of my favorite features."

Alex Huart
Director
Ordinaire

Mobile Employee Productivity

Electronics retailer, Teknosa, wanted a way to keep its mobile employees more connected to collaborate effectively on critical projects. By adopting Office 2010 throughout the company, Teknosa expanded security with improved document management and increase productivity of its mobile employees.

"Before, if somebody sent me an email while I was in transit, they might not get an answer until tomorrow. By using Office Mobile I can answer my email whenever I get it, and save people hours or even days."

Cem Isik
Big Stores Sales Manager
Teknosa

Remote Access Benefits

Twynham School, an innovative secondary school in the United Kingdom, wanted to provide students, staff, and parents with easy access to educational resources. Office 2010 helps Twynham solve collaboration and remote access problems.

"Students can connect to resources instantly and easily. Office Web Apps help students accomplish more. They can access applications through the browser, without needing software installed on their home machines. This removes many socio-economic issues."

Remote Access with Web Apps

Mediterranean Shipping Company is the second largest carrier in the world. They wanted to reduce the work involved in preparing data for analysis, cut storage and backup costs, and reduce employee distractions caused by e-mail overload. Office 2010 enables them to achieve faster data processing, better performance and easier analysis.

"In effect, Office Web Apps is a great remote access solution. We'll also be able to cut back on the amount of bandwidth we consume transferring files over the wire."

Fabio Catassi
Chief Technology Officer
Mediterranean Shipping Company

Work Anywhere and Everywhere

Webdunia.com provides Indian language technology products. To improve the community content platform, the company needed a better suite of products to help users create professional documents, create and share large presentations, and work while on the go. Webdunia.com decided to deploy Microsoft Office 2010 to take advantage of the enhanced tools and features.

"Office Mobile 2010 gives our users another way to work on the go. From viewing and editing documents with high fidelity to taking notes while on the go, Office Mobile provides them a world-class experience to help stay productive wherever and whenever they work."

Work From Anywhere

With employees working all over the world, fire-safety consultant hhpberlin needed to improve its project execution solution so that employees could share expertise and work together efficiently regardless of location. They found their solution in Microsoft Office 2010.

"Office 2010 was installed and I was able to start being productive right away. Because I travel two or three days a week, Microsoft communication tools are vital to me staying in close contact with my team. I can present myself as available, even when I'm on the road."

Karsten Foth

GERMANY

Creating Documents in Less Time

By deploying Microsoft Office 2010, McDonald's ČR, s.r.o. found new ways for its employees to work together and get more done in less time, resulting in a significant boost to productivity.

"It's imperative to get input from several team members on specific projects. With co-authoring, everything can be incorporated simultaneously. This alone saves us 250 minutes per month."

Jan Svika
IT Coordinator
McDonald's ČR, s.r.o.

Global Access to Shared Documents

ResMed, a global leader in the development, manufacturing and marketing of innovative medical products, deployed Office 2010 to deliver faster implementation of process improvements, leading to greater efficiency and cost savings.

"The Office 2010 Web Apps really assist here as a companion to the full Office suite that ResMed employees use at their desks. Whether in other ResMed locations around the globe or outside the office, employees can now make changes to shared documents or the Continuous Improvement notebook without worrying about file fidelity problems."

David Lewis
