An MSDN subscription provides all the keys you need to unlock your developer domain. It comes with the most powerful IDE in the world—Visual Studio—as well as exclusive perks to keep you ahead of an ever-changing technology landscape.

This guide is designed to ensure you're getting maximum value out of your MSDN subscription.

### Develop faster with monthly Azure credits.

MSDN subscriptions include Azure credits of up to $150 per month. Use these credits to develop and test applications with on-demand infrastructure that includes access to the virtual machine library, which contains everything from Windows Server to Linux.

Watch these instructional videos to find out how you can streamline your process:

- Spin up a VM in minutes
- Create a SharePoint Farm
- Get the inside scoop from Microsoft evangelist Boris Scholl

### Share development projects with Visual Studio Online.

Get up and running in minutes on a cloud infrastructure—without having to install or configure a single server. Visual Studio Online connects to Visual Studio, Eclipse, Xcode, and other Git clients to support development for a variety of platforms and languages.

### Keep your skills sharp with Pluralsight courses.

Supercharge your skills with world-class training taught by an elite group of industry leaders. Pluralsight courses give you the experience you need to succeed on the job and grow your career.  Learn on the go—elevate your mind with courses on your time, on any screen.
