

Modernize classic team site
(STS#0) homepage

Updating classic team sites with a modern homepage

- If a classic team site meets a certain criteria, the home page will automatically modernize the next time a user visits
- When users first experience the change, they'll see a walkthrough that highlights the new capabilities and includes a link to a help article with more details
- We encourage users to adopt the change in order to benefit from the power of modernized pages. However, if site admins or site owners want to revert to the classic home page, they can.

Criteria

- Classic team site (STS#0) only
- Home page name is 'Home.aspx'
- Contains default web parts only: getting started (GettingStartedWebPart), Newsfeed (SiteFeedWebPart), and document library (XsltListViewWebPart).
- No text is present (wiki HTML is not customized)
- DisplayFormTemplateName = "WikiEditForm"
- ModernizeHomepageOptOut feature is not activated

Experience walkthrough

User visits the site after the upgrade...
