

# Microsoft Surface Hub 2S

Share or send a file from Surface Hub 2S

1. A lot of Surface Hub apps include an option to share content directly from the device. Look for the Share icon in menus and toolbars like the one shown here.
2. When you select the **Share** icon, the Share panel is displayed on the right side of the screen with options for Email and OneDrive.

3. Select **Email** to display the Email details and attached file where you can add or remove recipients, change the Subject, and add a message.
4. When you are ready, select **Send**.
